<https://fluence.science/get-to-know-us/>

The screenshot shows the Fluence website homepage. At the top, there's a dark header bar with the text "FIND A RESELLER" and "RESELLER LOGIN". Below the header is a navigation bar with links: "FLUENCE" (with the "OSRAM" logo underneath), "GET TO KNOW US", "CULTIVATORS", "PRODUCTS", "EXPERTISE", "NEWS", "RESOURCES", "SHOP", and a menu icon. The main content area features a large image of a Fluence lighting fixture hanging over a crop. To the left of this image is a section titled "All for Light and Life" with two columns of text. Below this is a large video player showing a man working on a lighting fixture. At the bottom of the page is a teal-colored sidebar with the heading "Our Values and Vision" and a paragraph of text.

All for Light and Life

Fluence creates lighting solutions for controlled environment commercial crop production.

We apply the latest research in photobiology, evidence-based design, precise engineering and advanced technology to foster a healthier and more sustainable world.

Our Values and Vision

Everything we do is built on the values of curiosity, integrity, service, and passion. With our eyes on the challenges of the future, our vision is to help the world grow smarter.

Our Mission

At Fluence, we're on a mission to improve the interaction between light and life to yield a healthier and more sustainable world.

OUR HISTORY

Fluence was founded in Austin, Texas in 2013 by forward-thinking entrepreneurs Nick Klase and Randy Johnson to build custom-spectrum LED solutions.

With a desire to bring innovation to the market, they were the first to introduce white light that mimics sunlight. The solutions Fluence launched were a stark departure from the inefficient lighting systems cultivators previously relied on. Fluence lights used less energy, lasted longer, and ran cooler, enabling tiered setups that multiplied indoor grow spaces while achieving impressive savings in energy, HVAC, and water costs.

In 2014, the company branched out from the research space and began designing systems that could lead to more sustainable forms of crop production. The result was a diverse product portfolio that allowed the world's largest greenhouses and indoor farms to move away from wasteful legacy lighting to the quality, output, and reduced footprint realized by LED grow lights.

In 2018, Fluence was acquired by the Munich-based lighting manufacturer, OSRAM. By combining Fluence's proven leadership in LED-based horticulture lighting systems with OSRAM's expertise in lighting technologies, sensors, and connectivity, Fluence is today empowering cultivators worldwide to increase their output and quality, while achieving new margins and profits.

The scientific revolution that inspired our founding continues apace. With a strategy built on the latest research and evidence, Fluence is poised to remain at the vanguard of these advances, delivering intelligent plant growth solutions to help cultivators grow smarter.
